☒ Create Meet

Feature File:

```

Feature: create a meet
  As a logged in user
  I want to create a new meet

  Scenario: meet created succesffuly
    Given I am logged into the system
    When I press the button for a new meet
    And I fill the title, description and location field
    And I select a date in the calendar
    And I choose a category in the drop down menu
    And I press the button create meet
    Then display message that the meet has been successfully created
    And show the created meet

  Scenario: meet created with errors
    Given I am logged into the System
    When I press the new button for a new meet
    And I fail to fill all fields with correct data
    Then display error message
    And user has to fill out wrong fields again
  
```
